

EURMARS 3rd Pilot Demonstration & Final Event.

Welcome to the third edition of the EURMARS newsletter, where we share important updates and upcoming highlights from the project. In this issue, we focus on the upcoming 3rd Pilot Demonstration and Final Event, which will take place from 30 June to 4 July 2025 in Bulgaria.

As a valued member of our community, whether you connected with us through our website, an event, or our social media channels, we're glad to have you on this journey. In this newsletter, you'll find an overview of what to expect at the final event and a reflection on the project's most significant milestones so far.

About the Final Event

Today marks the beginning of a major milestone for the EURMARS Project, the Final Event and 3rd Pilot Demonstration.

Over the past three years, the EURMARS consortium, bringing together leading research institutes, security practitioners and technology providers from across Europe, has worked intensively to design, develop and test a state-of-the-art surveillance platform aimed at enhancing EU border security.

This week's event is not only a live technical demonstration of our capabilities but also a celebration of our shared journey. It offers a chance to showcase the innovations, lessons learned and real-world impact of our work, while engaging with stakeholders, end users and partners from across Europe.

We look forward to a week of collaboration, insights and a powerful display of the progress EURMARS has made in shaping the future of European security research.

What to Expect at the Final Event

Live Demonstration of the EURMARS Platform

Experience a live showcase of our integrated surveillance technologies in realistic operational conditions, simulating EU border scenarios.

Real-World Use Cases

See how EURMARS solutions are applied to both maritime and land border challenges in real world applications.

Meet the Experts Behind EURMARS

Get to know the project's key contributors and learn more about their roles and insights.

Stakeholder Engagement

Engage with security stakeholders, policy makers and end users in interactive discussions.

Feedback & Lessons Learned

Join in collecting reflections and feedback that will inform the final project outcomes and contribute to future research directions.

Networking Opportunities

Connect with experts, share knowledge and build partnerships for future collaboration.

A Look Back: EURMARS in Action

Throughout the project's duration, EURMARS has actively engaged stakeholders across Europe through a diverse range of activities, from hands-on workshops and pilot demonstrations to expert roundtables and participation in major conferences. These efforts have not only advanced our platform's development but also fostered collaboration and innovation in European border security. Here are some key highlights of our journey so far:

Pilot Demonstration in Cyprus

Successfully showcasing EURMARS capabilities in search and rescue operations.

What's Next? A Final Newsletter Ahead

Following the conclusion of the Final Event, we will issue the fourth and final edition of the EURMARS newsletter. This closing issue will highlight the outcomes of the demonstration in Bulgaria, share lessons learned and reflect on the project's journey from concept to completion.

Stay tuned as we wrap up this exciting chapter and look ahead to the future impact of our work.
